- Cutaneous Melanoma – Therapeutic Algorithm. Departmental lecture, Medical Center of Delaware, 1996.
- **Research Projects**

- Principal Investigator, Pfizer Inc. Protocol A3191331 – Gastrointestinal randomized event and safety open-label nsaid study (GI-REASONS): A randomized, open-label, blinded-endpoint, parallel-group trial of GI safety of celecoxib compared with non-selective nonsteroidal anti-inflammatory drugs (NSAIDS) in osteoarthritis patients.
- November 2007 to present

- Principal Investigator, unfunded, IRB approved, “Retrospective, non-controlled chart review with phone interview for routine post-op follow-up to retrieve patient recovery time after endoscopic carpal tunnel release procedure”. October 2007 to present
